

FloraFlex[®] | FERTIGATION Nutrients INSTRUCTIONS

The FloraFlex[®] Original Application Guide has a suggested dilution rate of 1:100 (or 1%) for an EC of 0.

Estimated dilution amounts are as follows:

- 1 V1[™] approximately 200 grams per gallon.
- 2 V2[™] approximately 200 grams per gallon.
- 3 B1[™] approximately 200 grams per gallon.
- 4 B2[™] approximately 250 grams per gallon.

Approximate maximum solubility of each blend is:

- 1 V1[™] 0.5-1 lb per gallon at 70°
- 2 V2[™] 0.5-1 lb per gallon at 70°
- 3 B1[™] 0.5-1 lb per gallon at 70°
- 4 B2[™] 0.5-1 lb per gallon at 70°
